*“Only a proper contextualization process leveraging on the vast knowledge available on the Web, can enable machines to turn raw Data into valuable Information”*

## About me

José Luis is currently a last year Phd Student in the Multimedia Communications Department at EURECOM, in France. He is truly convinced that the use of advanced information extraction techniques, combined with the prior knowledge available on the Web and semantic approaches leveraging on them, can drastically improve the way we exploit textual and audiovisual data.

## Areas of Specialization

Semantic Web, Ontology Modeling, Knowledge Representation, Multimedia, Information Extraction, Natural Language Processing, Machine Learning

## Education

2012-2016 **Doctor of Philosophy**, *Computer Science and Multimedia*, EURECOM, Télécom ParisTech, Sophia Antipolis, Nice, France.

**Semantically Capturing and Representing Contextualized News Stories on the Web.** International news stories in textual and audiovisual form come full of connotations, codes, conventions and implicit paradigms, involve very different agents in many locations, and deliver partial information thus neglecting the whole picture of the event that is often assumed as known. In this Phd I explored how to leverage on the data available in the Web for summarizing into a single knowledge unit the contextual information necessary for making sense of the news story being told, providing humans and machines with details that were not explicitly included in the original document.

2011-2012 **MSc. in Computer Science**, *University of Extremadura*, Cáceres, Spain. (Avg. score: 9,60/10).

**Improving Linked Data Consuming Processes in OntoTV through the use of Ontology Alignment Techniques.** The process of integrating Linked Data sources in information systems involves high temporal costs and manual-based efforts to reconcile different data schemas, therefore attenuating the great advantages that LD can offer over conventional data retrieving methods. This research proposes the use of ontology alignment techniques in order to minimize the impact of these problems.

- 2010-2011 **MSc. in Research**, *University of Extremadura, Master MUI-TINC*, Cáceres, Spain. (Avg. score: 9,05/10).  
**Applying Linked Data Methodologies in a Television Content Management System** Application of Linked Data methodologies in the television domain in order to improve viewer's watching experience. As part of the implementation of the OntoTV television framework, we have developed different components for ingesting information from Linked Data sources. The reconciled and enriched information has been published according to the same Linked Data Principles so it becomes available in the Web of Data.
- 2010-2011 **BS in Computer Science and Systems**, *University of Extremadura*, Cáceres, Spain. (Avg. score: 8,32/10).
- 2008-2009 **BS in Computer Science for Business Processes**, *University of Extremadura*, Cáceres, Spain. (Avg. score: 8,35/10).
- 2003-2008 **Degree in Computer Science**, *University of Extremadura*, Cáceres, Spain. (Avg. score: 8,21/10).  
**Multimedia Interactive Applications over Digital Terrestrial Television** The new interactive approaches in digital television and transmission standards like DVB-T offer an interesting variety of services for both producers and consumers. In this project, a Multimedia Home Platform (MHP) based framework has been developed for probing the efficiency of this low-cost solution technologies in supporting viewers when consuming content.

## Experience

- 2011-2012 **Research Assistant**, *Quercus Engineering Group*, University of Extremadura (UEX), Cáceres, Spain.  
 Development of an ontology-based management system for digital television that harmonizes content descriptions from various existing sources and represent them by using knowledge engineering. Search and recommendation operations over the collected data are offered in order to improve the viewers' experience.
- 2009-2011 **Software Developer**, *Quercus Engineering Group*, Cáceres, Spain.  
 Development of a Java application (WeAPoN) for designing administrative processes and converting them into RDF according to a domain specific ontology. The workflows are graphically specified by using Petri nets diagrams that are converted into an ontological representation. We leverage on the resulting graphs to automatically generate Web applications that implement the desired administrative workflow.
- 2007-2008 **Research Assistant**, *Group of Applied Telematics Engineering and Advanced Communications*, Cáceres, Spain.  
 Study of valid scenarios for developing interactive Multimedia Home Platform applications by using low-cost components, together with the implementation of different digital interactive applications for deploying e-learning services over DVB-T channels.

## Projects

- 2015-2016 **Next Generation TV**, *Enriched content on interactive TV devices*, Fonds unique interministériel (FUI) Call 19, 3 academic and 2 industrial partners.
- 2015-2016 **3Cixty**, *Enabling Visitors to Explore a Smart City*, EIT Digital, Knowledge and Innovation Community of the European Institute of Innovation and Technology, 10 academic and 5 industrial partners.

- 2011-2015 **LinkedTV**, *Television linked to the Web*, FP7 IP Call 5, 8 academic and 4 industrial partners.  
  
 Integrated and practical approach towards experiencing Networked Media in the Future Internet
- 2012-2014 **MediaMixer**, *Community set-up and networking for the reMIXing of online MEDIA fragments*, FP7 CSA Call 8, 5 academic and 3 industrial partners.  

- 2011-2012 **PD10006**, *Regional Founding for Young Researchers*, Junta de Extremadura, Spain.
- 2009-2011 **TIN2008-02985**, *National Research Project*, Spanish Ministry of Education and Science, Spain.

## Awards and Scholarships

- 2015 **Best Paper Award**, *K-CAP 2015 Conference*, Palisades, New York, U.S., October 7th - 10th.  
 The Concentric Nature of News Semantic Snapshots: Knowledge Extraction for Semantic Annotation of News Items
- 2015 **Semantic Web Challenge**, *ISWC 2015 Conference*, Bethlehem, Pennsylvania, U.S., October 11th - 15th.  
 3cixty@Expo Milano 2015: Enabling Visitors to Explore a Smart City.
- 2010-2012 **3 year PhD scholarship**, *Spanish Ministry of Education and Science*, Cáceres, Extremadura, Spain, October 11th - 15th.  
 Consuming Information about Television Content from Linked Data Sources

---

## Software Tools and Prototypes

- 2014 **HyperTED**, <http://linkedtv.eurecom.fr/Hyperted/>, An innovative way of consuming TED talks, Consuming particular chapters, key fragments highlighting, spotting relevant entities, and seamlessly jump to related resources on the Web like other chapters and educational courses.
- 2014 **LinkedTV News**, <http://linkedtv.project.cwi.nl/news/>, Expanding News with Named Entities, Helping the users to interpret international news via relevant entities playing a role in the depicted story.
- 2013 **MediaFinder**, <http://mediafinder.eurecom.fr>, What fresh media are you looking for?, Web framework which creates visual illustrations from media items shared by the crowd on social platforms.
- 2012 **Github/jluisred**, <https://github.com/jluisred>, Tools, services and apps implemented and under development for the different project mentioned above.

---

## Other Activities

### PC Member

**WWW2016**, 25th International World Wide Web Conference, (Poster/Demo Track).

**SIMBig2015**, 2nd International Symposium on I. Management and Big Data.

**ISWC2015**, 14th International Semantic Web Conference, (Poster/Demo Track).

**ESWC2015**, 12th European Semantic Web Conference, (Poster/Demo Track).

**ISWC2014**, 13th International Semantic Web Conference, (Poster/Demo Track).

**ESWC2014**, 11th Extended Semantic Web Conference, (Poster/Demo Track).

**SIMBig2014**, 1st International Symposium on I. Management and Big Data.

**Subreviewer for HT2014**, 25th ACM Conference on Hypertext and Social Media.

### Mentoring

- 2015 **Chaima Ben Rabah**, *Collecting microposts shared on social networks and reconstructing timelines of events.*
- 2014 **Mariella Sabatino and Pasquale Lisena**, *Searching and browsing through fragments of TED Talks and Developing a Media Fragment Server on Node.js.*
- 2014 **Phan Trung**, *Grab your Favourite TV Show and Share it.*

---

## Languages

Spanish **Native.**

English **Full professional proficiency.**

French **Professional working proficiency.**
